

Made Tough Pumps for Steel & Metal Applications Matrix

GPM Overview

GPM manufactures and distributes the toughest, most reliable submersible and horizontal slurry pumps found anywhere in the world. Founded in 1978, GPM has Steel, Aluminum, Copper and other metal manufacturing customers throughout North America. GPM has six office locations with OEM manufacturing facilities in Duluth, Minnesota. Our objective is to help our customers gain or maintain a distinct competitive advantage in their marketplace through equipment and processes that are cost-effective, dependable and reliable. For over 40 years, we have been solution-driven.

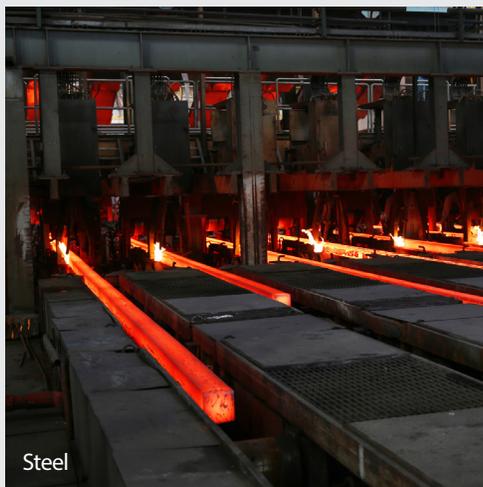

When you need to pump it, blow it, heat it, seal it, move it, gear it or cool it... think GPM.

GPM-Eliminator Advantages

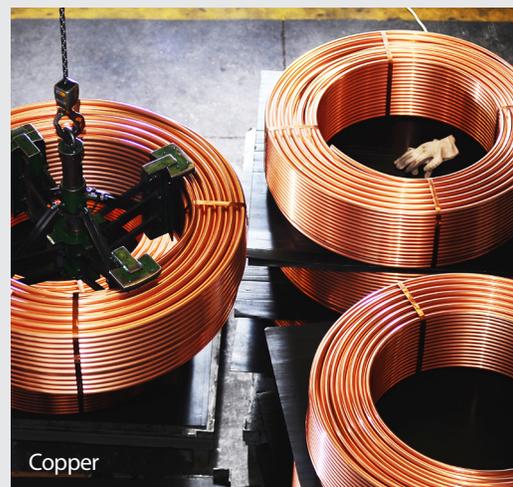

- Permanently lubricated bearings
- No seal flush required
- Enclosed shaft not exposed to product
- Increased bearing support
- Less shaft deflection
- Longer pump options for deeper applications
- Run dry capabilities
- Class H insulated premium efficiency motors
- Explosion Proof options available
- 28% high-chrome, 650+ Brinell hardness liquid ends
- Spray hole casings for added sump agitation
- Closed, semi-open and open impeller options available
- Pumps solids up to 4.5" diameter
- Eliminate packing
- Increased MTBF
- Adjustable wear plates
- Made tough to handle severe slurry applications
