

The Pit Master Dewatering Barge System

Lift it, Push it, Drag it - It's Made Tough™

In your world, your business is all about aggregate exposure and removal. You need dewatering solutions that work. Improve your business functions by incorporating GPM's Pit Master Dewatering Barge system into your plans. GPM's experienced engineering and production teams will configure your pump and raft combinations to meet the specific demands of your operation. With the correct pump in the right place, you'll have a smooth-running operation 24/7/365.

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Industrial Duty</p>		<p>INDUSTRIAL DUTY</p> <ul style="list-style-type: none"> • Sturdy Design • Durable Steel Frame Construction • Pipe Skid Tubing for Stability • Foam-Filled LDPE Floats • Removable Pump Lifting Bar • Discharge Hose Support Clamps • Suitable for Nearly ALL Submersible Pump Manufacturers • 4x Lifting/Anchor Point for Ease of Installation, Removal, and Mooring • 1,900 lbs. Pump Capacity

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">X-Treme Duty</p>		<p>X-TREME DUTY <i>All of the Above Plus the Below Features</i></p> <ul style="list-style-type: none"> • All of the Above Plus the Below Features • Robust Design • Supreme Structural Support • Rugged Push/Pull Skid Design • Best Mobility • 1,300 lbs. Pump Capacity.

Barges Designed Specifically for Pit, Mine, and Quarry Dewatering Applications

GPM's Pit Master Dewatering Barge Systems are built for the toughest applications and environments. With carefully designed, heavy-duty construction, built for pumping anything from clean water to abrasive solids, our dewatering solutions provide the reliability, dependability, and performance your operation demands.

Typical Applications:

- Pit Dewatering
- Tailings Basin Control
- Construction Dewatering
- Recycle Process Water
- Reservoir/ Dam Bypass
- Emergency Flood Control
- Wash Plant Supply
- Environmental Remediation
- Booster Pumps
- Dredging
- Wastewater
- Solids Handling
